Chicago, IL 60642 | gnm5@illinois.edu | +1 447- 902-7212 | [linkedin.com/in/gayatri7/](https://www.linkedin.com/in/gayatri7/)

EDUCATION

University of Illinois at Urbana-Champaign, United States

Aug 2024 – May 2026

Masters in Information Science

(GPA: 3.88 / 4.0)

Coursework: Machine Learning Cloud, Statistic Models, Market Analytics, Data Mining, Methods of Data Science, Intro to Gen AI

University of Mumbai, India

Aug 2018 – May 2022

B.Tech in Electronics Engineering

(GPA: 3.8 / 4.0)

Coursework: Database Management, Data Analytics with Python, Goods and Service Marketing, Business Analytics

SKILLS

- **Languages & Databases:** Python, SQL, Spark, C, C++, R, PostgreSQL, MongoDB, MySQL, PL/SQL, MATLAB,
- **Tools:** AWS (Redshift, S3, Glue), Snowflake, Hadoop, Airflow, SAP, Hive, Power BI, Tableau, QuickSight, QlikSense, Azure, SAP
- **Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, PyTorch, Keras, Seaborn, OpenCV, SciPy, NLTK
- **Other:** Hypothesis Testing (t-test, Chi-square), Time Series Analysis, A/B Testing, Cohort Analysis, MS Office (VBA Excel)

EXPERIENCE

Amazon, United States | Business Intelligence Engineer Intern

May 2025 – Aug 2025

- Built **QuickSight** dashboard using **SQL** and **AWS Redshift** to analyze warehouse flows across the fulfillment network, comparing historical vs forecasted capacity plans to identify inventory gaps, **increasing SDC utilization by 24%**
- Developed **Fullness Forecast** and **FNKU utilization metrics** for SDCs to redesign cube utilization in inventory allocation models, enabling routing of SKUs to lower-cost fulfillment centers, improving last-mile delivery cost efficiency and capacity planning
- Designed and deployed automated planning tools for SDC planning in **Excel** leveraging **GenAI** to streamline workflow automation, empowering stakeholders to perform independent analysis and eliminate manual data ingestion, **saving 10 hours per week**
- Led SDC WBR revamp by automating **ETL** pipelines, standardizing KPIs, translating supply chain insights into executive narratives and reducing **reporting latency by 42%**, accelerating decision-making across planning and operations teams

ZS Associates, India | Business Technology Solutions Associate

Jul 2022- Jun 2024

- Forecasted volume trends using **time series models** on historical prescribing data, identifying high-value physician-account affiliation pattern visualizing performance ranking in Tableau for NA drug launch strategy, **driving 33% increase in client sales**
- Applied **K-means** and **Random Forest** to segment healthcare records; designed **A/B tests for North America region** using chi-square and t-tests to validate incentive structures and campaigns, reducing monthly wasted sales rep costs by **\$1.5M**
- Led **Teradata to Snowflake migration** of healthcare records using **Agile** sprints, coordinating iterative data validation cycles with engineering and vendor teams, delivering with **100% data integrity**
- Designed **Snowflake star schema** integrating healthcare sales, and operations datasets; reduced **ETL runtime by 50%** via QlikSense QVD parallel processing and **Airflow**-orchestrated DAGs, eliminating redundant transformations

ZS Associates, India | Business Technology Solutions Associate Intern

Jan 2022 - Jun 2022

- Conducted **root-cause investigations** into consumer engagement drop-offs (email sign-ups, purchase history, retention), analyzing ad performance metrics to identify recurring data quality issues, driving corrective actions that improved engagement by **34%**
- Deployed **self-service Power BI** reporting with automated MTD/QTQ/YTD calendar logic, translating complex analytical outputs into clear client-facing dashboards enabling leadership to independently monitor KPIs across multiple product portfolios
- Owned delivery pipeline as lead for two major franchises, running biweekly stakeholder reviews; tracked project dependencies in Jira, delivered **20 UAT enhancements per quarter** and presented strategic findings in QBRs

P2S Information Systems, India | Market Data Analyst Intern

Aug 2020 – Dec 2021

- Leveraged customer data analysis and **Google Ads** to develop targeted digital advertising strategies for consultative sales clients, optimizing campaign performance and generating **20K+ qualified leads**
- Built client-facing dashboards to track sales performance, **top/bottom 10 performer rankings** and digital advertising KPIs, translating campaign data into actionable insights to support client decision-making

ACADEMIC PROJECTS

Los Angeles Crime Detection

- Engineered hybrid ML models on 1M+ LAPD crime records, to classify high-risk zones and forecast monthly crime volumes in Python, uncovering seasonal spikes and demographic patterns using **Random Forest** and **SARIMAX**
- Optimized **XGBoost** model using cross-validation, grid search, and ROC-AUC, achieving **92% accuracy, 0.79 AUC**, and 31 MAE; identified key predictive features (victim age, time-of-day, location) to improve model transparency
- Deployed real-time and batch predictions via SageMaker with S3 integration, reducing demographic bias by 18% through fairness-aware preprocessing and **LLM-augmented** natural language crime trend reports from model outputs

Alumni Membership Growth Model

- Segmented 5+ alumni groups using **chi-square tests**, identifying mid-career professionals (~74%) as highest-value segment to inform **targeted ad campaign strategies** and drive conversion
- Analyzed digital engagement metrics across 3+ channels (email, web, events), **applied t-tests** and **A/B testing** to compare cohort engagement rates and funnel drop-offs, **optimizing ad messaging** and **improving campaign attribution accuracy**
- Built **regression model** to predict membership likelihood, identifying graduation year as strongest predictor ($p < 0.001$); **generated post-campaign performance reports** with channel recommendations to maximize conversions
